### PERSONAL DETAILS

---

Date of birth	17 July 1985
Marital Status	Married
Nationality	Sudanese
Gender	Female

### TEACHING PHILOSOPHY

---

My teaching philosophy as a language teacher is totally student-centered. I believe that the learning process happens in every student's brain in a different way, but it is our job to evaluate how the students learn better to provide them with the right activities that make them meet their potentialities and embrace that potential to face the real world in the future. I don't teach just a language, I show the students a whole new world by using a target language. We should be able to assess students' progress in different ways and not just exams.

As language teachers we should help learners develop their skills in our area of expertise by providing or modeling the context that they need to learn a specific structure, set of vocabulary, idiom, etc.. In my classes, I work to create a genuine rapport with learners. This allows me to build on that connection and make them trust that I will not ask them to do something that wouldn't benefit their learning, even if it's hard. I think that English learners need to be able to trust themselves, their instructors, and their classmates above all. That way, in a safe environment, the mistakes that they will make as a learner don't knock their confidence.

I believe that anyone can learn a language if they given enough time and practice, and I'm willing to be creative and find ways and unusual learning styles to help all students benefit from my lessons. My goal is to expose English learners to more of the world and prepare them for intercultural communication. I teach using a variety of techniques because every class is different and has unique needs

### OBJECTIVES

---

- To obtain a teaching position where I can utilize my knowledge of advanced teaching methods such as team learning and e-learning.

- Develop and promote creativity and high-order thinking skills that increase the performance of the students.
- To secure a position as a teacher and utilize my dedication to foster quality education required for a student's development.
- To build a long-term profession as a teacher that will offer endless opportunities for career growth and to keep up with cutting-edge educational technologies.
