## CRITERION 5. CURRICULUM

## A. Program Curriculum

## A.1. Description of the study plan for students in the program

The Electrical Engineering Department has maintained a strong commitment to provide high quality programs by conscientiously evaluating priorities and efficiencies of educational functions. Continuous revisions in curriculum have been updated based on the requirements of industries with respect to the recent technological developments. The revisions and modifications with reference to the standards of International Universities provided an opportunity to selfevaluate effectiveness of educational procedures and practices. The redesigned program consists of sequential and progressive courses. These courses provide the students with the fundamental knowledge of mathematical and scientific subjects with the basics of Electrical Engineering. The curriculum consists of a broad range of subjects that form the foundation of the electrical engineering discipline including the importance of engineering design.

The Electrical Engineering curriculum and course offerings are shown in Table 5.1 (per the template provided in the ABET self-study).

The study plan for the Electrical Engineering Department is designed to satisfy three main requirements. The first is the university requirement which includes the Islamic cultural and social courses. The second is the college requirement which involves the basic science courses and other courses related to the electrical engineering field. The third is the department requirement which includes the advanced courses in the electrical engineering filed with different sub disciplines.

The Electrical Engineering Program consists of 160 total credit hours:

- University Requirements: 15 credit hours.
- Faculty Requirements: 63 credit hours.
- Department Requirements: 82 credit hours.

## Table 5-1 Curriculum

## Bachelor in Electrical Engineering

| Course <br> (Department, Number, Title) <br> List all courses in the program by term starting with the first term of the first year and ending with the last term of the final year. | Indicate | Subject | Area (Credit H |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Whether <br> Course is Required, Elective or a Selected Elective by an $R$, an $E$ or an SE. ${ }^{1}$ | Math \& Basic Sciences | Engineering Topics Check if Contains Significant Design ( $\sqrt{ }$ ) | Other | Last Two Terms the Course was Offered: Year and, Semester, or Quarter | Maximum Section Enrollment for the Last Two Terms the Course was Offered ${ }^{2}$ |

1. Required courses are required of all students in the program, Elective courses (often referred to as open or free electives) are optional for students, and Selected Elective courses are those for which students must take one or more courses from a specified group.
2. For courses that include multiple elements (lecture, laboratory, recitation, etc.), indicate the maximum enrollment in each element. For Selected Elective courses, indicate the maximum enrollment for each option.
Instructional materials and student work verifying compliance with ABET criteria for the categories indicated above will be required during the campus visit

## A.2. Alignment of the curriculum with the program educational objectives.

The mapping of the Student Outcomes to Program Educational Objectives is shown in Table 5.1.

Table 5.1: Relationship between Program Educational Objectives and Student Outcomes

|  | Program Educational Objectives | Specific Skills | Student Outcomes |
| :---: | :---: | :---: | :---: |
| PEO1 | Become a technically qualified engineer to address complex problems and be able to apply learned skills in engineering careers | identify, formulate, and solve complex engineering problems | SO1 |
|  |  | apply engineering design | SO2 |
|  |  | develop and conduct appropriate experimentation | SO6 |
|  |  | acquire and apply new knowledge | SO7 |
| PEO2 | Become effective members of engineering teams through interpersonal skills gained by conducting experiments and during practical training | communicate effectively | SO3 |
|  |  | function effectively on a team | SO5 |
|  |  | develop and conduct appropriate experimentation | SO6 |
| PEO3 | Demonstrate the professional skills necessary to be competent employees, assume leadership roles, and have career success and satisfaction | apply engineering design | SO2 |
|  |  | communicate effectively | SO3 |
|  |  | function effectively on a team | SO5 |
| PEO4 | Demonstrate ethical values, life-long learning attitude and societal responsibilities | recognize ethical and professional responsibilities | SO4 |
|  |  | acquire and apply new knowledge | SO7 |

## A.3. The support of the curriculum and its associated prerequisite structure to the attainment of the student outcomes.

An assessment tool is used each semester for each course to measure the level of achievement of each Course Learning Outcomes which is linked to the Student Outcomes via Performance Indicators and this tool is reviewed by the Assessment Committee and Curriculum Committee. The result from this review assures the quality of departmental courses and becomes part of the continuous improvement. Student outcomes are involved by most of the core courses, the degree of involvement is presented in the Table 5.2.

## A.4. Flowchart of the prerequisite structure of the program's required courses.

A flowchart showing the prerequisite requirements for the required Electrical Engineering courses is shown in Figure 5.1 and Tables 5.3 to 5.12.

Table 5.2: Involvement of Student Outcomes in core courses

| Course Code | Course Name | SO1 | SO2 | SO3 | SO4 | SO5 | SO6 | SO7 |

## A.5. Program requirements in terms of hours and depth of study for each subject area (Math and Basic Sciences, Engineering Topics)

## Mathematics and Basic Sciences content:

The Math requirements are covered by courses required for graduation. This includes "General Mathematics", "Calculus 1", "Calculus 2", "Calculus 3", "Differential Equations", "Numerical Methods" and "Statistics and Probability". (21 credit units).

Chemistry and Physics are foundational material to the basic engineering science courses. Basic Sciences requirements are met by two courses in Chemistry with Lab (7 credit units) and two courses in Physics with Lab (7 credit units). Mathematics and Basic Sciences courses are summarized in Table 5.13.

Table 5.13: Mathematics and Basic Sciences courses

| No. | Course Code | Course Title | Credit <br> Units | Contact <br> Hours |

|  | Total |  | $\mathbf{1 1}$ Courses | 5 |

## Engineering Topics:

The technical core prepares students not only for basic Electrical Engineering fields but also equip them with other much needed backgrounds by offering to them the courses like "Engineering drawing" course ( 2 credit units), "Engineering Design" course ( 3 credit units), "Engineering economy" course ( 2 credit units), "Thermal Engineering" course ( 3 credit units) and "Engineering Mechanics" course ( 2 credit units). These courses are taught by Mechanical Engineering and Industrial Engineering Departments in our Faculty of Engineering.

The technical core which includes the advanced courses in the electrical engineering filed is formed by 7 disciplines presented in Table 5.14

Table 5.14: Electrical Engineering Requirements Based on Disciplines

| Discipline | Course Code | Course Title | Credit <br> Units | Contact Hours |
| :---: | :---: | :---: | :---: | :---: |
| Electrical <br> Engineering | EE111-3 | Fundamentals of Electrical Engineering | 3 | 5 |
|  | EE112-2 | Electrical Circuits 1 | 2 | 4 |
|  | EE213-2 | Electrical Circuits 2 | 2 | 4 |
|  | EE214-2 | Electromagnetic Field | 2 | 4 |
|  | EE215-3 | Measurements | 3 | 5 |
|  | EE216-2 | Electrical Installations | 2 | 4 |
|  |  | 6 Courses | 14 | 26 |
| Powers | EE221-2 | Electrical Safety | 2 | 4 |
|  | EE322-3 | Power Production and Distribution | 3 | 5 |
|  | EE323-3 | Power Systems 1 | 3 | 5 |
|  | EE424-3 | Power Systems 2 | 3 | 5 |
|  | EE425-3 | Switchgear and protection of power systems | 3 | 5 |
|  | EE426-3 | High voltage engineering | 3 | 5 |
|  | EE427-2 | Economic Operation of Power Systems | 2 | 2 |
|  | EE428-2 | Renewable Energies | 2 | 4 |
|  |  | 8 Courses | 21 | 35 |
| Automatic Control | EE341-3 | Automatic Control | 3 | 5 |
|  | EE342-2 | Microprocessor | 2 | 4 |
|  | EE343-2 | Robotics | 2 | 4 |
|  |  | 3 Courses | 7 | 13 |
| Machines | EE251-3 | Electrical Machines 1 | 3 | 5 |
|  | EE352-3 | Electrical Machines 2 | 3 | 5 |
|  | EE353-3 | Power Electronics | 3 | 5 |
|  | EE354-3 | Electrical Machines 3 |  | 5 |
|  | EE455-2 | Simulation of Machines | 2 | 4 |
|  |  | 5 Courses | 14 | 24 |
| Electronics and communications | EE271-3 | Electronics | 3 | 5 |
|  | EE272-2 | Digital Design | 2 | 4 |
|  | EE373-2 | Practical Special Topic | 2 | 6 |
|  | EE374-2 | Signal Processing | 2 | 4 |
|  | EE375-2 | Communications | 2 | 4 |
|  |  | 5 Courses | 11 | 23 |
| Elective Courses | EE491-3 | Elective Course 1 | 3 | 5 |
|  | EE492-2 | Elective Course 2 | 2 | 4 |
|  | EE493-2 | Elective Course 3 | 2 | 4 |
|  |  | 3 Courses | 7 | 13 |
| Training <br> Project | EE496-2 | Summer Training | 2 | - |
|  | EE498-1 | Senior Design Project 1 | 1 | 3 |
|  | EE499-3 | Senior Design Project 2 | 3 | 7 |
|  |  | 3 Courses | 6 | 10 |

## Elective Courses

The Electrical Engineering Program offered three groups of elective courses: Power Systems group, Automatic Control group and Machines group. The student must select three courses from the same group. Elective courses in each group are presented in Table 5.15.

Table 5.15: Elective courses of the Electrical Engineering Program

| Course Code | Course Title | Credit Units | Contact Hours |  |  | Prerequisite |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Lec. | Lab. | Tut. |  |
| Power Systems Group |  |  |  |  |  |  |
|  | EE491-3: Elective Course 1 |  |  |  |  |  |
| EE429-3 | Utilization of Electrical Power | 3 | 2 | 2 | 1 | EE323-3 |
| EngE492-2: Elective Course 2 |  |  |  |  |  |  |
| EE431-2 | High voltage applications | 2 | 1 | 2 | 1 | $\begin{aligned} & \text { EE426-3 } \\ & \text { EE429-3 } \end{aligned}$ |
| EE432-2 | Protection of power Systems | 2 | 1 | 2 | 1 | $\begin{aligned} & \text { EE424-3 } \\ & \text { EE429-3 } \end{aligned}$ |
| EE493-2: Elective Course 3 |  |  |  |  |  |  |
| EE433-2 | Organization of <br> Systems | 2 | 1 | 2 | 1 | EE429-3 |
| EE434-2 | Advanced Power Systems | 2 | 1 | 2 | 1 | EE429-3 |
| Automatic Control Group |  |  |  |  |  |  |
| EE491-3: Elective Course 1 |  |  |  |  |  |  |
| EE444-3 | Advanced Automatic Control | 3 | 2 | 2 | 1 | EE341-3 |
| EE492-2: Elective Course 2 |  |  |  |  |  |  |
| EE445-2 | Special Topic in Control | 2 | 1 | 2 | 1 | EE444-3 |
| EE446-2 | Control of Power Electronics | 2 | 1 | 2 | 1 | $\begin{aligned} & \text { EE444-3 } \\ & \text { EE353-3 } \end{aligned}$ |
| EE493-2: Elective Course 3 |  |  |  |  |  |  |
| EE447-2 | Computer Control | 2 | 1 | 2 | 1 | EE444-3 |
| EE448-2 | Components of Control | 2 | 1 | 2 | 1 | EE444-3 |
| Machines Group |  |  |  |  |  |  |
| EE491-3: Elective Course 1 |  |  |  |  |  |  |
| EE456-3 | Advanced Electrical Machines | 3 | 2 | 2 | 1 | EE354-3 |
| EE492-2: Elective Course 2 |  |  |  |  |  |  |
| EE457-2 | Electrical Drives Systems | 2 | 1 | 2 | 1 | EE456-3 |
| EE458-2 | Design of Power Electronics | 2 | 1 | 2 | 1 | $\begin{aligned} & \text { EE456-3 } \\ & \text { EE353-3 } \\ & \hline \end{aligned}$ |
| EE493-2: Elective Course 3 |  |  |  |  |  |  |
| EE459-2 | Application of $\quad$ Power Electronics | 2 | 1 | 2 | 1 | $\begin{aligned} & \text { EE456-3 } \\ & \text { EE353-3 } \end{aligned}$ |
| EE461-2 | Electrical Machine Design | 2 | 1 | 2 | 1 | EE456-3 |

## Summer Training

An important component of the curriculum is eight-week mandatory summer training. This provision allows the students to acquire hands-on professional experience pertinent to their choice of selection of available training opportunities which usually cover a variety of applications in Electrical Engineering field. During this summer training, the students gain valuable practical training in real competitive environment which not only provide them with an insight to the modern environmental engineering practices followed today but also give them an opportunity to interact, collaborate and work together with highly experienced professionals, which help students in their future professional growth.

## A.6. The broad education component.

The University requirements component provides students with a breadth of knowledge that enables them to work collaboratively with others and have an appreciation for other disciplines. These requirements courses help the students become socially responsible leaders, respect other cultures and religions and to be capable of making humane and responsible decisions. It enhances their understanding of the culturally diverse nature of the local and national society through using "Islamic Culture I", "Islamic Culture II", "Islamic Culture III", and "Islamic Culture IV" courses. The students' linguistic skills in English are enhanced by courses such as "English 1", and "English 2". The written and oral skills of the students are improved with the help of "Technical Writing", "Arabic Language Skills" and "Arabic Writing" courses. The students' general computer skills are enhanced by course such as "Introduction to Computer" and "Programming Language" courses. The relationship of the general courses and PEOs are outlined in Table 5.16.

Table 5.16: General courses

| General courses | PEO 1 | PEO 2 | PEO 3 | PEO 4 |
| :--- | :---: | :---: | :---: | :---: |
| 101SLM-2: Islamic Culture I |  |  |  | $\square$ |
| 102SLM-2: Islamic Culture II |  |  |  | $\square$ |
| 103SLM-2: Islamic culture III |  |  |  | $\square$ |
| 104SLM-2: Islamic culture IV |  |  |  | $\square$ |
| 101ARB-2: Arabic Language Skills |  | $\square$ |  |  |
| 102ARB-2: Arabic Writing |  | $\square$ |  |  |
| 101ENG-6: English 1 |  |  | $\square$ |  |
| 102ENG-6: English 2 |  |  | $\square$ |  |
| ENG357-3: Technical Writing |  |  | $\square$ |  |
| 101CSC-3: Introduction to Computer | $\square$ |  |  |  |
| CSC222-3: Programming Language | $\square$ |  |  |  |

## A.7. The design experience that prepares students for engineering practice.

Electrical Engineering Program has 11 courses out of 33 of the core courses, $34 \%$ of the core curriculum, that provide the students an ability to design a system, component, or process. These courses are: EE221-2: Electrical Safety, EE216-2: Electrical Installations, EE272-2: Digital Design, EE343-2: Robotics, EE425-3: Switchgear and protection of power systems, EE491-3: Elective Course 1, EE492-2: Elective Course 2, EE493-2: Elective Course 3, EE455-2: Simulation of Machines, EE498-1: Senior Design Project 1 and EE499-3: Senior Design Project 2.

Senior design project provides an integrated assessment of the students toward the desired electrical engineering competencies. The senior design project is the first step to transfer the students from the academic community to the industrial environment. The main target of the senior design project is to improve the students' technical skills, communication skills by integrating writing, presentation and teamwork opportunities. The senior design project is comprehensive and focuses on professional practice and includes a variety of non-technical issues such as professional and ethical responsibility, safety, reliability, and social impacts.

Senior design project is an independent study using a faculty advisor for guidance. The outcome of the student's work effort should be a coherent, logically organized senior project. As part of the senior project skills, the students will have the chance to demonstrate their capability to: manage the senior project, recognize the objectives, conduct the literature survey, perform the experiments and the relevant analysis, write the final senior project report, and deliver the main results. The project delivery might take the form of a report, simulation, prototype, or other type of specialized output.

Senior design project (EE498-1/ EE499-3) in the Electrical Engineering Department consists of two terms. Term one; students will have marks from 100 points. It is required a seminar for their project that contains a historical background, definitions, introduction, plan for next semester and the obtained results if any. Term two; students will have marks from 100 points. It's required a complete seminar for the whale projects, poster and project book with CD.

The objectives of Senior Design Project are:

- To use the skills acquired in the other courses to solve real engineering and technical problems.
- To enhance creativity of the students in analyzing and solving electrical engineering problems.
- Learn how to design and properly document a project based on technical requirements.
- To create an environment to promote cross disciplinary learning and team approach to problem solving.
- Communicate the project orally and in writing, using necessary supporting materials.
- To develop the ability of self-learning.
- To prepare students to be successful in their industrial careers.

By the end of the senior project, the student should be able to:

- Prepare a project concept document.
- Define the major problems that they may face during their practical work.
- Generate the possible solutions and select one alternative solution based on criteria.
- Acquire the necessary skills to communicate, negotiate, and evaluate their strengths and weaknesses as members of a team.
- Write a technical requirement document.
- Create and maintain a project schedule.
- Seek learning opportunities outside the classroom environment.
- Develop detailed design documents.
- Make oral presentations.
- Maintain a project schedule.
- Develop a test plan for a project.
- Build a system component.
- Test the operation of a system to prove it meets the requirements.

## A.8. Cooperative education

The cooperative education was studied to be included in the Electrical Engineering Program but it has not yet been implemented.

## A.9. Materials that will be available for review during the Visit

We will have the following material available for the program evaluator at the time of the scheduled visit.

- Course syllabi
- Textbooks
- Sample student work including quizzes, assignments, mid-term exams, final exams, course project reports, etc.
- Senior Design Project Reports and/or Posters

## B. Course Syllabi

In Appendix A of the Self-Study Report, include a syllabus for each course used to satisfy the mathematics, science, and discipline-specific requirements required by Criterion 5.
