ENDOCRINOLOGY	451ZOO	1	1	2	4	7	351O
<p>-Brief Course Description: This is a comprehensive study of the endocrine system which will allow the student to integrate and better understand the functions of the other systems of the body. Also, the pathological conditions associated with endocrine imbalance are investigated</p> <p>-Course Objectives This course is designed to provide students with the following concepts:</p> <ol style="list-style-type: none"> 1- To develop an understanding of the role of the endocrine system in maintaining homeostasis and health. 2- To identify the different types of glands and hormones. 3- To study the mechanism of action of different hormones. 4- To recognize the structure and function of endocrine glands 5- To identify diseases related to abnormalities in hormone secretion <p>- Course Contents:</p> <ol style="list-style-type: none"> 1. Chemistry of hormones – Types of hormones- Characterization of hormones- Synthesis of hormones -Mode of action of hormones- Regulation of hormone secretion. 2. Endocrine Glands (Hypothalamus and hypothalamus, Pineal gland, Thyroid and Parathyroid glands, Thymus gland, Pancreas, Adrenal, Genital glands and sex hormones). 3. Other endocrine organs (heart – kidney – fat tissues –stomach –duodenum) <p>- Assessment:</p> <ul style="list-style-type: none"> • Theoretical (quiz, essay, midterm exam): 20 % • Practical (class work, midterm exam, final exam): 30 % • Final exam: 50% <p>-Teaching Methods: Lectures, photographs, slides, multimedia, web-based videos</p> <p>- Text book:</p> <ul style="list-style-type: none"> • علم الغدد الصماء. تأليف الدكتور مدحت حسين خليل محمد. جامعة الأزهر (1997)، مكتبة المدينة- العين – الإمارات العربية المتحدة <p>-References: Endocrine Physiology by Patricia E. Hall PhD, Pub. Saunders, pp. 840-949</p>							
2. Course Main Objective							
This course aims to study the endocrine glands structurally and functionally and their role in regulation of metabolism, growth and reproduction in different animals. Some abnormalities of hormonal secretion will be discussed.
