4. Course general Description	
<p>Introducing the elements and foundations of interior design: Basic design defines the base of design aspects, in terms of design elements and principles that are generically applicable to any design stream. This course introduces the vocabulary, principles, concepts and processes applicable to design as a broad domain .The scheme would include visual studies with special emphasis on study of design elements: point, line, shape, form, space, color Including color systems (color wheels, properties of color, color principles), texture, and light. Design principles (proportion, harmony, rhythm, emphasis, dominance, balance, and unity). Spatial relationships :( space within a space, adjacent spaces, interlocking spaces, spaces linked by a common space). Types of design organizations: (centralized, linear, clustered, radial, and grid).</p>
